EXPERIENCE

Product Manager | Xbox Player Experiences – Microsoft 2024 – Present

- Spearheaded initiatives that enhanced **game discoverability**, **platform engagement**, and **inclusive player experiences** across Xbox endpoints.
- Drove **development of advanced AI-powered metadata systems** powering personalized content recommendations and game discovery experiences.
- Managed cross-functional v-teams, defined product strategy, and delivered high-impact features that **increased engagement and generated multimillion-dollar revenue growth**.

Product Manager Intern | Xbox Gaming Ecosystems – Microsoft 2022

- Strategized and executed a **storefront filter and sort system** improving content navigation and user discovery experiences across Xbox marketplaces.
- Developed a **discoverability strategy** for self-published titles, increasing visibility and engagement within the **indie developer ecosystem**.

Explore Intern (PM + SWE) | Yammer Security, Privacy & Compliance – Microsoft 2021

- Built and launched a **web-based security trivia game** that gamified compliance training for all Yammer engineers, boosting participation and knowledge retention.
- Collaborated with cross-functional teams to ship **secure, high-quality software solutions**.

GAME DEV

Director, Lead Developer & Narrative Designer | [I Fell In Love With A Mailman](#)

Godot Engine | 230 downloads, 1,400+ browser plays

- Directed and programmed a **dating sim visual novel** featuring an innovative **claw machine gameplay mechanic** that determines player choices.
- Wrote and implemented a **multi-ending narrative** inspired by classic holiday rom-coms, blending humor and emotional storytelling.
- **Oversaw creative direction and led a small development team** from concept to release, ensuring high-quality delivery on a tight timeline.

Director, Lead Developer & Narrative Designer | [Potion Promotion](#)

Godot Engine | 52 downloads, 540+ browser plays

- Directed and developed a **branching narrative visual novel** centered on moral decision-making and resource management.
- **Directed software development** and integrated visual and audio systems in collaboration with artists and sound designers to strengthen narrative cohesion.
